EDUCATION

University of California, Davis

Davis, CA

B.S. in Computer Science

Expected June 2026

- **Relevant Coursework:** Machine Learning, Computer Networks, Operating Systems, Computer Architecture, Data Structures & Algorithms, Algorithm Design & Analysis, Probability Theory, Linear Algebra

TECHNICAL SKILLS

Languages: JavaScript, HTML, CSS, SQL, Python, R, C, Go

Frameworks & Libraries: React, Node.js, Express.js, Tailwind CSS, Pandas, tidyverse, scikit-learn, FastAPI

Tools & Platforms: Git, GitHub, GitHub Actions, Postman, Playwright, Jest, Linux/CLI, OpenAI API

PROJECTS

LiftSurfer | *React Native, Expo, TypeScript, Zustand, Firebase*

March 2026 – Current

- Built a cross-platform mobile port (iOS/Android) of the **open-source** OpenPowerlifting website with **30+ weekly active users**, surfacing competition data spanning **300+ federations** and **110+ nations**.
- Implemented a filterable/sortable leaderboard with infinite scroll, lifter search with persistent history, athlete profiles with personal bests and meet history, and per-meet attempt breakdowns.
- Consumed OpenPowerlifting's public Rankings, Search, and CSV endpoints directly with no custom backend; managed server-state caching with **TanStack Query** and global client state with **Zustand**.
- Instrumented **Firebase Analytics** to track leaderboard filter usage and federation selections, providing behavioral insights to guide feature development.
- Configured **GitHub Actions** CI pipeline for automated linting and code quality checks across commits.

Counselor | *React, FastAPI, Tailwind CSS, SQLite*

Jan 2026 – Current

- Built a responsive **React frontend** styled with **Tailwind CSS**, featuring an **interactive schedule builder** that generates personalized academic roadmaps.
- Engineered a FastAPI backend that interfaces with the **Assist.org API** to aggregate complex articulation agreements and course equivalencies between institutions.
- Developed a **web scraper** using **BeautifulSoup** and the **OpenAI API** to extract and structure De Anza College's course catalog into a JSON format mapping prerequisite chains and course equivalencies.
- Implemented a **transcript parsing** feature allowing users to upload existing records, automatically populating their dashboard with completed credits and remaining requirements.

Student Dropout Prediction | *Python, scikit-learn, Pandas*

Jan 2026 – Mar 2026

- Built and compared three binary classification models (**Logistic Regression**, **Random Forest**, **XGBoost**) on a 4,424-record dataset of student demographic, financial, and academic features to identify at-risk students.
- Engineered ratio-based features (pass rates, GPA, academic improvement, evaluation efficiency) with **Z-score normalization**; tuned hyperparameters via **GridSearchCV**, achieving **recall** of **0.811**, **ROC-AUC** of **0.917**.

CERTIFICATIONS

Cisco Certified Network Associate (CCNA): In Progress (Expected June 2026)

CAMPUS INVOLVEMENT

Aggie Barbell Club – Powerlifting Coach

Jan 2023 – Present

- Coached 3 competitive powerlifters using data-driven fatigue analysis and volume optimization, resulting in 15% average 1RM strength gains over first 3 months

ColorStack – Active Member

Nov 2025 – Present

EXPERIENCE

Lamppost Pizza

Davis, CA

Crew Member

Aug 2024 – Sept 2025

- Provided **attentive support** by responding to customer needs, resolving issues quickly, and maintaining accuracy and professionalism under pressure.
